

How to make a pinhole camera to view the eclipse

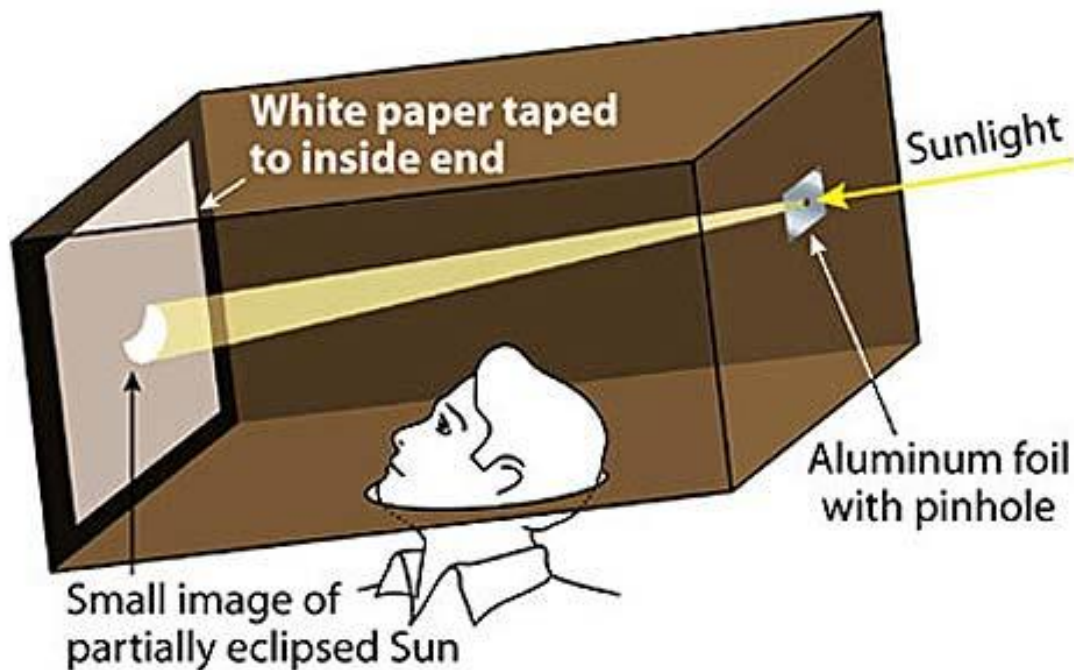

Needed:

1. A pinhole
2. A screen
3. Something to hold those together

Materials:

1. Aluminium foil
2. Cardboard box

Assembly: Cut out a small section of one end of the cardboard box. Tape a piece of aluminium foil over the cut out and use a thin needle to make a very small hole. A small hole gives a clearer, dimmer image; a larger hole gives a less clear but brighter image. Make a hole somewhere else in the box for you to look into.

CAUTION: NEVER LOOK DIRECTLY THROUGH THE PINHOLE AT THE SUN
